

Lab No. : KES/10-11-2014/MR338810  
 Patient Name : Mrs. ANJALI MONDAL  
 Age : 36 YRS  
 Ref Dr. : Dr. VINOD KALA  
 Date Of Collection :  
 Patient Id : PIA/262775  
 Sex : FEMALE  
 Report Date: 10/Nov/2014 06:24PM

**DEPARTMENT OF USG**  
**REPORT ON EXAMINATION OF LOWER ABDOMEN**

**KIDNEYS**

Both kidneys are normal in shape, size (Rt. kidney 98.6 mm. & Lt. kidney 95.2 mm.) axes & position. Cortical echogenicity appears normal maintaining cortico-medullary differentiation. Margin is regular and cortical thickness is uniform. No calcular disease noted. No hydronephrotic changes detected. Visualised part of upper ureters are not dilated.

**URINARY BLADDER**

Urinary bladder is distended, wall thickness appeared normal. No intraluminal pathology (calculi/mass) could be detected. Insignificant amount of post void residual urine noted.

**UTERUS**

Uterus is anteverted, normal in size (74.7 mm. x 37.6 mm. x 47.3 mm.). Endometrium is in midline. Myometrium appears smooth & homogenous without any detectable/sizable focal lesion. Cervix looks normal. Pouch of Douglas is free.

**ADNEXA & OVARIES**

Right ovary is normal in size, shape, position, margin and echotexture.

Right ovary measures: 28.8 mm. x 15.8 mm.

**Left adnexa shows a thick walled cyst (41 mm.) adherent to left side of uterus.**

- ? Left ovarian cyst. ✓

- ? Left ovarian mass. ✓

Left ovary measures: 39.8 mm. x 35.9 mm.

**RETROPERITONEUM & PERITONEUM**

No ascites noted.

No definite evidence of any mass lesion detected.

No detectable evidence of enlarged lymph nodes noted.

Visualised part of aorta & IVC are within normal limit.

**IMPRESSION**

**Study reveals:**

**Left adnexal thick walled cystic SOL.**

- ? Left ovarian cyst. ✓

- ? Left ovarian mass. ✓

*Refer to conditions of reporting overleaf*

**Age** : 36 YRS  
**Ref Dr.** : Dr. VINOD KALA  
**Date Of Collection** :  
**Patient Id** : PIA/443376  
**Sex** : FEMALE  
**Report Date:** 06/Apr/2015 05:32PM

**URINARY BLADDER**

Urinary bladder is distended, wall thickness appeared normal. No intraluminal pathology (calculi/mass) could be detected. Insignificant amount of post void residual urine noted (6 cc).

**UTERUS**

Uterus is anteverted, normal in size (78 mm. x 49 mm. x 40 mm.). Endometrium (collapsed wall) is in midline (ET = 9.8 mm.). Myometrium appears smooth & homogenous without any detectable/sizable focal lesion.

Cervix looks normal.

Pouch of Douglas is free.

**ADNEXA**

Adnexa appear clear with no obvious mass lesion could be detected.

**OVARIES**

Ovaries are normal in size, shape, position, margin and echotexture.

Right ovary measures: 30 mm. x 16 mm.

Left ovary measures: 30 mm. x 25 mm.

**RETROPERITONEUM & PERITONEUM**

No ascites noted.

No definite evidence of any mass lesion detected.

No detectable evidence of enlarged lymph nodes noted.

Visualised part of aorta & IVC are within normal limit.

**IMPRESSION :****Study reveals:**

1. Left upper and mid third ureter dilated with small echogenic foci seen in left lower ureter proximal to left uretero-vesicle junction.
2. Left sided hydronephrosis and left hydroureter.
