DEPARTMENT OF USG
REPORT ON EXAMINATION OF PELVIS

URINARY BLADDER

Urinary bladder is distended, wall thickness appeared normal. No intraluminal pathology (calculi / mass) could be detected. Insignificant amount of residual urine noted.

UTERUS

Uterus is anteverted, normal in size (6.3 cm. x 3.5 cm. x 3.2 cm.) Endometrium (7 mm) is in midline. Myometrium appears smooth & homogenous without any detectable/sizable focal lesion. Cervix looks normal. Pouch of Douglas is free.

OVARIES

Both ovaries are normal in size with multiple (more than 10) small subcapsular cysts (4-5 mm).
 Right ovary measures = 3.6 x 1.4 x 2.6 cm (vol:- 7 cc).
 Left ovary measures = 3.3 x 1.7 x 2.8 cm (vol:- 8 cc).

IMPRESSION

Bilateral polycystic ovarian disease.

DEPARTMENT OF USG
REPORT ON EXAMINATION OF PELVIS

URINARY BLADDER

Urinary bladder is distended, wall thickness appeared normal. No intraluminal pathology (calculi / mass) could be detected. Insignificant amount of residual urine noted.

UTERUS

It measures 6.6cm.x3.8cm.5.2cm. Uterine cavity containing a sonolucent sac 10x6.7mm. size having echodense zone around it - most likely gestational sac & it corresponds with 5Wks. size gestational sac. No SOL seen in myometrium. Cervical length = 1.7cm.

OVARIES

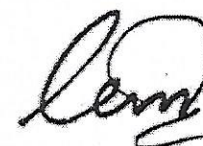

Ovaries are normal.

Right ovary measures = 1.8 cm. x 1.4 cm.

Left ovary measures = 1.8 cm. x 1.9 cm.

IMPRESSION

Uterine cavity contains a sonolucent sac - most likely gestational sac of 5Wk. size
- to evaluate further by Urine pregnancy test.
